

FREE COORDINATED SCHOOL HEALTH TRAINING SERIES SPRING 2010-2011

Suicide Prevention, Self Injury and Crisis Intervention

January 27 & 28, 2011

During this two day training participants will receive information on promising strategies relative to suicide prevention as well as suicidal interventions with self injurious youth. Additionally, participants will learn about the first critical steps of a crisis team in the immediate aftermath of student, parent or staff death by suicide. This course is geared towards teachers, school nurses, counselors, psychologists, school administrators and others who work with students in a school setting.

Location: Santa Clara Valley Medical Center Time: 8:30am-3:30pm

Bully Prevention, Health and School Safety Symposium

March 14, 2011

The focus of this Symposium is to promote safer school communities by assisting schools in understanding, formulating and implementing school safety strategies that address bully prevention. A Coordinated School Health approach will be utilized in accomplishing the above. Topics will include: definition of bullying, county data on prevalence, strategies to enhance a healthy school community, and school safety planning. This course is geared towards teachers, school nurses, counselors, psychologists, school administrators and others who work with students in a school setting.

Location: Santa Clara County Office of Education Time: 8:30am-4:00pm

HIV/STD

May 3, 2011

This one-day training provides a more in-depth look at STDs/HIV including trends, transmission, consequences, STD/ HIV connection, and appropriate risk-reduction messages for this population. Available at this training will be free STD-specific resources, including "STD 101 for Teens" PowerPoint, and *Making the Connection Between STDs and HIV* Lesson Plans. This course is geared towards teachers, school nurses, and other staff that teach mandated HIV/AIDS education and/or comprehensive sexual health education in middle and high schools, especially those who work with at-risk youth in alternative education settings.

Location: Santa Clara County Office of Education Time: 8am-3:30pm

*** Tobacco Prevention and the Impact of Drugs on the Adolescent Brain** **TBD**

This training addresses the physiology of addiction and the health risks of tobacco and drug use. Current research on brain function and development will change perceptions about the risks of adolescent drug use. How parents can talk about tobacco and drug use with their child will also be discussed.

**This training is scheduled twice per year based on district request. Please contact Armida Alvarez.*
